

PEAK Real Estate Management Group, a privately owned property management and development company in Costa Mesa, and **Hoban Property Management Co.**, announced an alliance for property management services for 90 San Diego apartment communities totaling 3,000 units. “These are unprecedented economic times,” says **Patrick Antrim Jr.**, president and CEO of PEAK. “Owners must be as vigilant as ever if they hope to achieve positive results in these difficult operating conditions. More tenants are delinquent, utility costs are rising, credit is compressed, and cap rates are headed in the wrong direction. That’s where we come in, and deliver industry-leading best practices to improve operational and financial performance.”
